

## THE RIGHT ANGLES

In a heritage home with dramatic rooflines, the small bathroom was modernized and opened up to flood it with warm and inviting natural light.

BEFORE

### Favourite Features

- Removing the two closets that flanked the window alcove exposed more of the sloped ceiling, turning the roofline angles into a design feature.
- Opting for a nearly all-white space allowed the geometric pattern of the floor tiles to be a focal point.
- The alcove is the perfect place for the freestanding soaker tub. Leaving the windows uncovered fills the space with natural light.
